Status: Proposed

Project Type: Education

Location: Nairobi, Kenya

MLC PREP SCHOOL NAIROBI, KENYA

The Montessori Learning Centre design proposal set this special education institution on a narrow and very steeply sloped lush site in a residential neighborhood. The school therefore sought to respect the neighborhood scale and preserve the existing site ecology via the incorporation of several lush and wild gardens. Materials are as local and natural as possible being a combination of exposed Nairobi stone and timber. The roof lines of the various detached and meandering structures give the centre a village sensibility as well as creating defined outdoor learning spaces, thus reducing the scale of the campus.
