"Developing transformational leaders through innovative approaches to education"

The M-Pesa Foundation Academy is designed to provide high quality secondary school education in an inspiring and spacious country setting for boys and girls within the 8-4-4 National Curriculum, but in need. This secondary level academy was designed to cater for 960 boarding students aged between 14 and 18 years together with their teaching and support staff. It consists of a state-of-the-art co-ed boarding school, with each year having 6 streams of 40 students. Interactive residential life facilities at the academy enable and extend the academic experience and include a rich array of activity spaces and buildings to develop well rounded individuals.

The M-Pesa Foundation Academy, whose mission is "Changing Lives" was very intentionally designed to be heavily technologically oriented.
