PROJECT TYPE

Hospitality

LOCATION

Kikambala, Kenya

YEAR

Completed in 2018

Sultan Palace, located in Kikambala, north of Mombasa, has an excellent position on the Indian Ocean coast line.

Azure sea, coral reef, soft white sand, cool breezes and palm trees come together to make this an ideal resort location. Consideration is given to sea views and cooling breezes to give maximum value and enjoyment to each of the residential units and hotel rooms. The style of the hotel and nearby residential units is a modern take on an Arabian palace, and the surrounding architecture throughout the rest of the resort is inspired by the local Swahili idiom.

The buildings incorporate cool, contemporary features to give guests and residents a modern yet authentically Kenyan experience.
