

Mi Vida KEZA Housing, Riruta, Nairobi, Kenya

SERVICES PROVIDED

Architect

PROJECT TYPE

Residential

LOCATION

Riruta, Nairobi, Kenya

STATUS

Ongoing

Conceived as the residential component of what is a wider master planned mid-scale, mix-use development. Keza is a lower middle income residential development consisting of studio, 2 bed and 3 bed apartment units. Located in Riruta, this communities vision was from the very start aimed at enhancing a vacant lot within the heart of this fast growing residential neighborhood, especially aided by its superb connectivity. The masterplan encompasses a unique combination of commercial, living, leisure and shopping spaces. The design addresses the pragmatic and qualitative aspects of residential life by providing all required modern amenities, convenience and social well-being, qualities that are often unaddressed in the urban environment in developing countries. The development aims to play a vital role in the transformation and inspiration to the wider context of the precinct, providing quality yet inexpensive opportunities for affordable residences, in combination with green methodologies to promote a humane and comfortable living.
