

Samara, Thika, Kenya

SERVICES PROVIDED

Architect

PROJECT TYPE

Low Income Housing

LOCATION

Thika, Kenya

STATUS

Proposal

PLANNING is designing Samara Estate as an affordable housing development. Samara is located in Migaa, Kiambu on an approximately 19-acre site. It consists of 1959 units; of which 1488 are 3 Bedroom units while 471 are 2-bedroom units all distributed across 26 blocks of 9 or 10 floors each. The development is planned to include a parking silo, a nursery school, recreational facilities & retail spaces. The site blends with the lush green landscape, incorporating non-motorised transport to allow for basic mobility promoting health benefits for residents. The maximisation of natural light, natural ventilation, and open views due to the spatial organisation of the blocks enhances liveability and interaction with the natural environment.
